Key Technology Features

Industry Leading Detection Performance

120+
Simultaneous UxS
Detection Load

500+ MODELS
Extensive Library

360 DEGREES
Area Detection

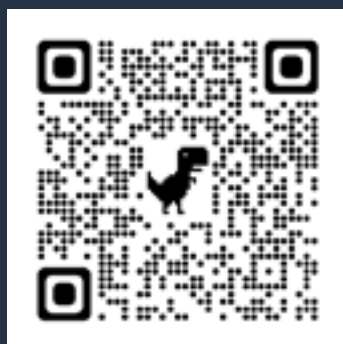

0 SIGNAL
Emissions*

AI Powered Identification

- Detects drones even if they are not in the library
- Supports multiple wireless protocols and modulations
- Fast and efficient edge processing
- Differentiation between friend and foe
- Customized spectrum visualization and site analysis
- Recording of detection data: for day-to-day record keeping, detection time stamps, forensic evidence, and future analysis

Integrated AI Detect & Defeat Solution:

Full sensor fusion built into one portable system with additional support for radar and optics

Swarm Defense:

360° of CUxS detection protects the area of operation from multiple threats (swarms)

Durable Construction:

Designed to meet rugged military standards with resistance to shock, weather, and UV exposure

Cost Effective Solution:

Lower cost solution compared to other CUxS AI Systems

IXI ELECTRONIC
WARFARE

CADENCE XL
