

ELECTRONIC WARFARE

DUET XL

DUET XL is a networked jammer that actively disrupts the control signal between the drone and its operator. With its ruggedized design, it withstands the vibration and shock of military vehicles as well as hard environmental conditions such as dust, salt, and solar radiation. Used either autonomously or manually, DUET XL works with both CADENCE and CADENCE XL drone detectors, automatically jamming drone control signals once they are detected.

Combine with other IXI EW products for a complete system

DUET XL easily integrates with CADENCE & CADENCE XL

Technical Specifications

► CONFIGURATION

Weight	1500 GRAMS
Dimensions	H:2.5x W:4.8x D:6.9 inches
Color	Black

► ENVIRONMENT & POWER

Operating Temps	-40°C to +65°C
Power Supply	Power over Ethernet
Transmit Power	Both automatic and manual
Transmit Power	Up to 2W average/ Up to 100W peak

► BANDS

Frequencies	2.4GHz, 5.2GHz, 5.8GHz
-------------	------------------------

► OVERVIEW

- Ruggedized for use on military and civilian vehicles
- Smart jamming with only a few Watt output power
- Easy integrates with other systems
